Ideation Phase

Define the Problem Statements

Date: 31 January 2025

Team ID: _____

Project Name: House Renting System (React + Node.js + MongoDB)

Customer Problem Statement Template

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because / Which makes me feel
PS-1	House Seeker / Tenant	find a suitable house for rent online	there is no centralized platform with verified listings	it wastes time visiting multiple places and creates frustration
PS-2	Property Owner / Landlord	rent out my property quickly	it is difficult to reach genuine tenants	I worry about trust, verification, and delays
PS-3	Tenant	compare different houses based on price, location, and	information is scattered across different websites	it makes decision-making confusing

		facilities		
PS-4	Landlord	manage tenant details and rental agreements	manual paperwork is time-consuming	it increases chances of errors and poor management
